Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #36346

National Survey of Midlife Development in the United States (MIDUS 3), 2013-2014

Data Set 1: Aggregate Data

1. **Linking Variable and Related Collections:** The variable **M2ID** is the linking variable for the three datasets in this collection. The data in this collection can also be linked to all MIDUS data sets using the variable **M2ID**, including wave 1 (ICPSR 2760) and wave 2 (ICPSR 4652).

2. **Additional Information:** For additional information on the Midlife in the United States survey, please visit the MIDUS Web site.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

C1SA26A: Vigorous job activity frequency (summer)

The next section asks about various "levels" of physical activity (vigorous, moderate, light) - while at your job, while at home, and during your leisure/free time. Please answer each question thinking first about summertime, and then about wintertime. (If the question does not apply to you, for example, because you do not have a paid job or are retired, please circle 6 for "Never.") Vigorous physical activity causes your heart to beat so rapidly that you can feel it in your chest and you perform the activity long enough to work up a good sweat and are breathing heavily. Examples include: competitive sports like running, vigorous swimming, or high intensity aerobics; digging in the garden, and lifting heavy objects. How often do you engage in vigorous physical activity - WHILE AT YOUR PAID JOB...DURING THE SUMMER?

C1SA31: Waist around navel (inches)

The next questions are about body measurements. We have enclosed a tape measure to help you. It is yours to keep. The information will be more accurate if you follow these suggestions: Make measurements while standing. Avoid measuring over clothing (even thin clothing can add a 1/4 inch). Try to record answers to the nearest quarter (1/4) inch. What is your waist size-that is, how many inches around is your waist? Please measure at the level of your navel.

C1SE3: Rank standing in community on ladder

Think of this ladder as representing where people stand in their communities. People define community in different ways; please define it in whatever way is most meaningful to you. At the top of the ladder are the people who have the highest standing in their community. At the bottom are the people who have the lowest standing in their community. Where would you place yourself on this ladder? Please check the box next to the rung on the ladder where you think you stand at this time in your life, relative to other people in the community with which you most identify.

C1SL13: Who does more household chores

Running a household involves a lot of chores like cooking, shopping, laundry, cleaning, yard work, repairs, and paying bills. Couples vary in who does these things. The next question asks about how you split these chores. IF you have children, please do not count childrearing tasks such as bathing them, taking them places, or helping them with their homework, but do include chores like doing their laundry, washing their dishes, or cooking for them. Overall, do you do more of such chores, does your spouse or partner do more of them, or do you split them equally?
